

APSSDC Imparting Full stack Training:

What Is the Course Covers?

You will learn how to work on different aspects of web development including HTML, CSS, and Bootstrap, JavaScript, Angular and other essential technologies. You will go through each of these segments in a step by step manner and gain expertise in each of them. The courses cover both theory based learning as well as practical application. Live projects give hands on experience to work as a full stack developer.

Training Hours –120

Mode of Training: Online

Time:

Target Audience:

Any Comp Science from UG/PG

Full Stack Career Opportunities

According to a recent report by Belong.co, there will be a 20% higher demand for full-stack developers in this financial year. If we were to take the long term view, the World Economic Forum states that software & application development is among the top 5 emerging skills by 2020.

There are 17 industries including education, transportation, logistics, healthcare, recreation, travel, fitness, retail, etc. who have posted openings for front-end, back-end, and full stack developers.
