NEWSLETTER 2018

Signing In :

Wow ! successfully we have bid fare-well to 2018. Now let's welcome New Year 2019. Happy New Year and a joyful beginning. We always aspire for many things and take new resolutions to make our life a story of great achievements. Let's not lose the fire but keep moving because life is a bundle of new things and new people. Ample experiences await us. Let's view last month's activities of our college.

Principal's Desk :

There is a festive outlook and great jubilation at the dawn of a new year. Perhaps you had an opportunity to watch some of the live programme in the media about the new year gala. The whole atmosphere vibrates with the new energy of good wishes and a sincere prayer that everything may go well in the new year. I too avail this wonderful opportunity to greet each of you personally and wish you a very Happy and Prosperous New year 2019.

The market is flooded with new year offers of various kinds and at times we are at a loss to make a decision regarding the purchase of the right commodity with maximum benefits. However, with regard to life, we have no choice but to live it. To everyone, without any difference, the time allotted, gifted is equal. For the rich and the poor, young and old, men and women, boys and girls: to everyone equal time is awarded as a great opportunity to become a successful person. This passion for success is the only 'mantra' which drives human being to greater heights. It is the reward for persons who are willing to work hard. This is what I wish you for this New Year. May you have a greater share in hard work to make your dreams come true. We shall be grateful for the year that is past. We shall live courageously in the present and with full hope and trust shall leap in to the future. Happy New Year and God's abundant blessings on each of you!. - Dr. Sr. Mercy

Students' Block : Workshops Organized :

B.Voc. Web Technology and Multimedia department organized a three day workshop on **Word Press Technology** from 3rd to 5th December, 2018. Word Press is an online open source website creation tool based on PHP. It is the easiest and most powerful blogging and website content management system in existence today. II and III B.Voc students participated and created many online websites valid for one year.
