A piece of iron which may hardly cost some fifteen rupees when it undergoes a transformation could become a horse-shoe which is worth 450 rupees. When this iron piece further refined it would turn into an expensive spring of a wrist watch costing some 5000 rupees. Further transformation of this iron piece would make it an important part of the car engine which amounts to 10 lakhs to 2 crores of rupees. Still further transformation and refinement of this iron piece can turn it into an important instrument in the cockpit of an aeroplane which is worth 250- 500 crores of rupees. Likewise, every experience and transformation we undergo will make us a unique personality and a rare gem. But the path to the top is a hard one. We will be tested in the furnace of life, where the procedure is tough. Most of the people are not willing to undergo this tough path and wants to reach the top in short cuts. Precisely this is the reason why most of us remain as an old piece of iron, unwilling to undergo the transformation. Let's view the winter month's newsletter with child-like inquisitiveness.

Principal's Desk :

“Climbing to the top demands strength, whether it is to the top of Mount Everest or to the top of your Career.” - APJ Abdul Kalam. This strength is a holistic one, say, Physical, Mental and Spiritual. Our will power, dedication, determination besides hard work help us to attain our goals in life.

Month of November , especially 14th of November is specially remembered and dedicated as 'Children's Day'. The first ever Children's day was celebrated in 1954. The idea of a Universal Children's Day was suggested by Mr. V.K. Krishna Menon and it was adopted by the United Nations General Assembly. In India, November 14 was celebrated as Children's Day only after Nehru's demise in 1964. Prior to this, much like other countries, Children's Day was celebrated on November 20, that is the Universal Children's Day as declared by the United Nations.

Nehru felt that children are the real strength of a country and the very foundation of Society. Children's Day is celebrated across India to increase awareness of the rights, care and education of children.

It is my sincere wish for every member of our 'Theresian family' to be transformed into the finest personality rendering unmatched service to the entire world.

There is a nostalgia in each of us to return to our childhood days. Those are the bygone days which perhaps will never return. But we can cultivate the child like qualities in us and thus celebrate the childrens' day.

Month of November brings along with it a lot of pleasant feelings especially in the climate. We feel quite happy to be free from the extreme heat condition and like to coil inside the blanket for longer hours especially mornings. As for ‘the Theresian family’ it was a hectic time of activity. We have achieved much more than any other months in the past. As we thank God for every small and great opportunity, let us pledge to explore every opportunity to be the best. Theresian Chime will keep you always informed and keep you up-dated. Stay tuned...
